COMPANY PROFILE

Qianyi is a professional manufacturer of disposable paper packaging products, dedicated to providing high-quality, cost-effective and eco-friendly paper packaging solutions for global customers with mature production strength and professional service capabilities.

Equipped with advanced imported production equipment and optimized production processes, we achieve efficient cost control and stable supply, ensuring superior product quality at competitive prices to help our customers gain market advantages.

Main Products: Paper Cups, Takeaway Boxes, Salad Bowls, Paper Plates, Paper Straws. All products are made of high-quality food-grade materials, non-toxic, degradable, and fully compliant with international standards (FDA, EU, GB). A strict quality control system guarantees consistent product reliability, including customized solutions.

With rich export experience, our products are sold to over 50 countries and regions worldwide. Backed by a professional trade team and perfect logistics & after-sales service, we have won wide customer recognition.

Adhering to the philosophy of "integrity, mutual benefit and win-win", Qianyi is your reliable partner for disposable paper packaging. We look forward to your cooperation!

Single Wall Paper Cup

Environment

Single Wall Paper Cup

Single wall cups are made from food-grade recyclable paper and are suitable for hot and cold drinks. We adopt automatic mechanization production mode, ensure health, safety and quality of the product. In addition, we offer customizable services that can be printed in up to 8 colors, helping to enhance the brand image of our customers.

Double Wall Paper Cup

Double Wall Paper Cup

Double Wall Paper Cup

Double wall cups are made of food-grade recyclable paper, with a layer of paper on top of the single-layer paper cup to form a barrier. This insulation increases the comfort of the cup, enabling it to be used for both hot and cold drinks. The production process adopts fully automatic advanced mechanization to ensure product health and safety and ensure product quality.

PLA Straw

PLA is a new type of biodegradable material. Firstly, starch is extracted from corn or cassava, which is fermented to lactic acid, then dehydrated to lactide, and then ring opening polymerized to PLA. PLA has good biodegradability. It can be decomposed into carbon dioxide and water by microorganisms under certain temperature and humidity. It does not pollute the environment and is very beneficial to the environment. It is recognized as an environmentally friendly material.
